UltraPulse® ActiveFX™

Fractional Laser Treatments

Our skin changes over time, losing its youthful look and giving way to brown spots, wrinkles and laxity. In recent years there has been a growing number of aesthetic procedures available to treat the skin. ActiveFX yields remarkable, long lasting results with just one treatment. A fast, office-based procedure with minimal patient downtime, ActiveFX is your **single-treatment** solution for wrinkled, sun-damaged skin.

Is ActiveFX right for you?

ActiveFX is an ideal treatment option if you:

- **have a busy lifestyle** or cannot be away from work for a long time
- **want noticeable results** with minimal downtime
- want to **treat dyschromia, fine lines** and **wrinkles**

What is ActiveFX?

With ActiveFX treatment, a high-energy beam of laser light interacts with the skin's surface causing the upper layer to peel off and regenerate a layer of new, healthy skin. The laser beam is applied in a fractional pattern, leaving small "bridges" of untouched skin. This technique makes the healing process much faster and enables you to get back to normal activities sooner.

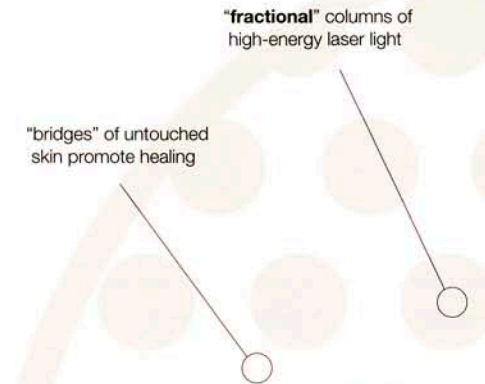

ActiveFX Benefits

ActiveFX produces a dramatic effect on the skin:

- Causes immediate collagen contraction
- Reduces wrinkles and fine lines, and softens deeper frown lines
- Noticeably improves skin tone and texture
- Stimulates new collagen formation and plumps the skin¹

Results of treatment can be maximized with proper sun protection. Most effects of treatment become visible right away, whereas others—such as new collagen formation—build up gradually and results in continued smoothing over time. Therefore, most people continue to show improvement up to six months after the procedure.

¹ Ross E, McKinlay J, Anderson R. Why Does Carbon Dioxide Laser Resurfacing Work? *Archives of Dermatology*, 135:444-454, 1999.

A high-energy laser beam is applied in a fractional pattern over the surface of the treatment area, leaving areas of untouched skin to promote quicker healing.

FRACTIONAL LASER PATTERN

ActiveFX is a fractional laser treatment for pigmentation and fine lines that yields remarkable results with minimal downtime.

What can you expect following ActiveFX?

You may feel warmth similar to sunburn following your ActiveFX treatment. You can drive yourself home after the procedure. With a gentle washing and moisturizing regimen, your phototreated skin will begin to flake off within 2 days. After about 4-7 days, your doctor will probably let you wear make-up. Pinkness is often gone in about a week.
